

Fine tuning of MWM ReelTrack in Puerto Rico

MWM System Inc. provided training and consulting to El Nuevo Dia in December 2009. During this time, the managers in El Nuevo Dia's Finance department were provided with suggestions on how to better utilize the MWM ReelTrack system to meet their daily and monthly reporting needs. MWM also spent some time customizing reports for the Finance department.

El Nuevo Dia has been a valued customer of MWM since 2000. Their facility boasts four Goss double-out presses and their average monthly roll inventory of approximately 34,200. They utilize MWM's ReelTrack, CopyTrack and Report Tool product offerings to manage production at their facility.
